

## The TABLE.

- Observ. 25. Of the stinging Points of a Nettle.
- 143 *A description of the Needles and several other contrivances in the leaf*
- 144 *of a Nettle: how the stinging pain is created: upon this several considerations about poisoning Darts are set down. An Experiment of killing Eggs, and Fishes with Salt. Some conjectures at the efficacy of Baths; the use that may be made of injecting into the*
- 145 *Veins. A very remarkable History out of Bellonius; and some Considerations about staining and dying of Bodies.*
- Observ. 26. Of Cowage.
- The description of it out of Parkinson: an Experiment made of it: a description, and some conjectures at the cause of the Phenomena.*
- Observ. 27. Of the Beard of a wild Oat.
- 147 *The description of its shape and*
- 148 *properties: the manner of making a*
- 149 *Hygroscope with it; and a Conje-*
- 150 *cture at the causes of these motions,*
- 151 *and of the motions of the Muscles.*
- 152
- Observ. 28. Of the Seeds of Venice Looking-glasses.
- 153 *The description of them.*
- Observ. 29. Of the Seeds of Time.
- 154 *A description of them. A digression about Natures method.*
- Observ. 30. Of Poppy Seeds.
- 155 *The description and use of them.*
- Observ. 31. Of Purslane Seeds. 156
- A description of these and many other Seeds.*
- Observ. 32. Of Hair. 157
- The description of several sorts of Hair; their Figures and Textures: the reason of their colours, A description of the texture of the skin, and of Spunk and Sponges: by what passages and pores of the skin transpiration seems to be made. Experiments to prove the porousness of the skin of Vegetables.*
- Observ. 33. Of the Scales of a Soale. 162
- A description of their beauteous form.*
- Observ. 34. Of the Sting of a Bee. 163
- A description of its shape, mechanism, and use.*
- Observ. 35. Of Feathers. 165
- A description of the shape and various contexture of Feathers: and some conjectures thereupon.*
- Observ. 36. Of Peacocks Feathers. 168
- A description of their curious form and properties; with a conjecture at the cause of their variable colours.*
- Observ. 37. Of the Feet of Flyes, and other Insects. 170
- A description of their figure, parts, and use; and some considerations thereupon.*
- Observ.

## The TABLE.

- Observ. 38. Of the Wings of Flyes.
- 172 *After what manner, and how swiftly the wings of Insects move. A description of the Pendulums under the wings, and their motion: the shape and structure of the parts of the wing.*
- 173
- 174
- 175 Observ. 39. Of the Head of a Fly.
- 1. All the face of a Drone-fly is nothing almost but eyes. 2. Those are of two magnitudes. 3. They are Hemispheres, and very reflective and smooth. 4. Some directed towards every quarter. 5. How the Fly cleanses them. 6 Their number. 7. Their order: divers particulars observ'd in the dissecting a head. That these are very probably the eyes of the Creature; argued from several Observations and Experiments, that Crabs, Lobsters, Shrimps, seem to be water Insects, and to be framed much like Air Insects. Several Considerations about their manner of vision.*
- Observ. 40. Of the Teeth of a Snail.
- 181 *A brief description of it.*
- Observ. 41. Of the Eggs of Silkworms.
- 182 *Several Observables about the Eggs of Insects.*
- 183 Observ. 42. Of a blue Fly.
- 184 *A description of its outward and inward parts. Its hardness to indure freezing, and sleeping in Spirit of wine.*
- 185
- Observ. 43. Of a water Insect.
- 186 *A description of its shape, transparency, motion, both internal and progressive, and transformation. A History somewhat Analogous cited out of Piso. Several Observations about the various ways of the generations of Insects: by what means they act so seemingly wisely and prudently. Several Queries propounded. Postscript, containing a relation of another very odd way of the generation of Insects. An Observation about the fertility of the Earth of our Climate in producing Insects, and of divers other ways of their generation.*
- Observ. 44. Of the tufted Gnat.
- Several Observables about Insects, and a more particular description of the parts of this Gnat.*
- Ob. 45. Of the great belly'd Gnat. 195
- A short description of it.*
- Obser. 46. Of a white Moth.
- A description of the feathers and wings of this, and several other Insects. Divers Considerations about the wings, and the flying of Insects and Birds.*
- Obf. 47. Of the Shepherd Spider.
- A description of its Eyes: and the sockets of its long legs: and a Conjecture of the mechanical reason of its fabrick; together with a supposition, that 'tis not unlikely, but Spiders may have the make of their inward parts exactly like a Crab, which may be call'd a water Spider.*
- Obfer. 48. Of the hunting Spider.
- A short description of it: to which is annexed an excellent History of it, made by Mr. Evelyn. Some further*
- M m      Obser.
